Profile

M.Sc. Design specialized in UX and Healthcare, with an interdisciplinary background in medical science, information technology and user-centred design. Through working as a Consultant I have become versed in managing and mediating clients, as I collaborated with multi-national teams on both Java backend software and a React Native application.

I spend my spare time continuously learning, building software, experimenting with new technologies, and traveling through the United States to network with others in the technology sector.

Education

IT University of Copenhagen   08/2020 — 06/2022

Master of Science in Digital Design

Thesis: Type-Extensible Objection Notation (TXON)
